The Ultimate Solutions to Rejuvenate Your Skin

SAFE, NON-INVASIVE, AND EFFECTIVE.

MORPHEUS8

WHAT IS MORPHEUS8?

Morpheus8 is a fractional skin treatment that stimulates the underlying layers of the dermis. By targeting the deeper layers of the skin, tissues are triggered to reveal a more radiant youthful appearance.

KEY BENEFITS OF MORPHEUS8

- Increase collagen and elastin production for skin tightening
- Diminish fine lines and wrinkles
- Lift and tighten loose skin
- Fade stretch marks
- Improves skin texture and reduces acne scars
- Short treatment time with no downtime

WHAT AREAS CAN BE TREATED?

Morpheus8 can be used in any area that can benefit from subdermal renewal. The treatments are versatile and customized to deliver optimal results to different areas of the body.

EYES

FACE / NECK

BEAUTIFY
@ DR. BISHOP'S

Morpheus8 utilizes tiny needles to deliver precise RF(Radio Frequency) energy deep into your skin, **prompting natural healing and boosting collagen and elastin production.**

This targeted approach leads to denser collagen production compared to similar technologies.

This non-surgical procedure requires minimal healing time and is favored by beauty insiders and celebrities.

MORPHEUS8

HOW QUICKLY WILL I SEE RESULTS?

Visible results can be seen within a few days, but typically after three weeks the most noticeable results appear.

CAN ANYONE USE MORPHEUS8?

Morpheus8 can be used on all skin types. The unique properties allow even darker tones to be treated.

SKIN TIGHTENING, REMODELING TREATMENT

“Morpheus8 was a game changer! My skin is glowing and radiant. I couldn't be happier with my results.”

- HANNAH | PATIENT

MORPHEUS8

WHAT IS THE BENEFIT OF FRACTIONATED ENERGY?

Radio Frequency (RF) energy is a scientifically proven method to stimulate collagen. It is minimally invasive, using a matrix of micro pins to target the deeper layers of the skin with almost no patient downtime.

HOW MANY SESSIONS ARE RECOMMENDED?

Your practitioner will recommend the ideal number of sessions to be performed based on your personal objectives. Treatment times and frequency will be specifically tailored to obtain the best results.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

Downtime after a Morpheus8 procedure is minimal. Patients should expect to see a slight redness immediately following the treatment and micro lesions a few days after treatment. It is recommended to moisturize the treatment area, avoid direct sun exposure, and use a broad-spectrum sunscreen.

CAN BE USED IN COMBINATION WITH OTHER TREATMENTS

REFRESH AND REFINE YOUR BEAUTY

LUMECCA (IPL) SKIN CARE

WHAT IS LUMECCA?

Lumecca is the most powerful intense pulsed light (IPL) to treat pigmented and vascular lesions. After just one use, patients notice significant improvements in the complexion and clarity of the skin. Lumecca operates using photothermolysis, which provides a photofacial through the delivery of a comfortable light treatment.

HOW MANY SESSIONS DO YOU NEED?

An improved skin appearance can be noted after the first session. Multiple sessions provide even better results. Treatment regime depends on the severity of skin damage, skin type, type of treatment (vascular vs sun damage) and energy settings.

Benefits of Lumecca IPL PhotoFacial Treatment

- Age spots
- Vascular lesions
- Rosacea
- Redness
- Freckles
- Sun damage
- Acne & Acne Scarring

“ I would definitely recommend Lumecca. I like how it brightened my face and gave me a beautiful glow. I can really see a difference. ”

- PAMELA | PATIENT

Discover a superior solution to improve skin complexion, reduce skin irregularities, and look years younger.

3 Treatments

Avoid direct, excessive sun exposure or tanning one month prior to treatment

VASCULAZE

VASCULAR BLEMISH
SOLUTION

The ultimate vascular resolution for a quick and comfortable treatment.

WHAT IS VASCULAZE?

The appearance of veins can be unsightly, causing both women and men to seek treatment options. Lesions can be very visible (long and bulging) or spider veins, which are smaller, finer and shorter (lines or web-like).

Vasculaze can help alleviate a wide variety of facial and leg vein issues with a laser that is targeted to treat the blood vessel causing the blemish. Vasculaze has an specially designed head that is built to pinpoint the vein or vein network, making treatments precise and safe.

The technology in the Vasculaze sends pulses of light onto the vein, which makes the vein slowly fade and disappear, preventing the need for unpleasant incisions and needles.

HOW COMMON ARE VASCULAR LESIONS?

Vascular lesions are present in 10-15% of adults, with a greater number in females than males. They can be prevalent in a contained body area, spread out over multiple body areas, or show up as a singular line or cluster. The use of Vasculaze can help treat existing lesions and prevent them from getting worse.

WHAT TYPES OF VEINS CAN BE TREATED?

Our Medical Aesthetician will need to do an assessment of your vascular lesions and let you know the types of vascular veins to treat are: facial and spider veins, port wine stains, leg veins, telangiectasias and angiomas. Varicose veins are typically larger and are not suitable for Vasculaze.

Causes of Vascular Lesions:

- **FAMILY HISTORY OR GENETICS**
- **OLDER AGE**
- **SEDENTARY LIFESTYLE**
- **WEIGHT GAIN**
- **PROLONGED STANDING**
- **PREGNANCY**

@ DR. BISHOP'S

VASCULAZE

“ When I noticed my first leg vein, and it never really bothered me. Over the next few years the problem grew and before I knew it, it was so bad that I had to wear pantyhose on even the hottest days. I finally got tired of hiding, and I am so thankful that Vasculaze has helped me to tear those pantyhose out of my life. ”

- DOROTHY | PATIENT

HOW MANY SESSIONS ARE REQUIRED?

Typically three sessions are performed, however, some lesions may require more. Gradual improvements in the treatment area can be seen following the first treatment – with the skin’s surface looking clearer as treatments progress.

WHAT IS THE RECOVERY?

Fortunately, Vasculaze treatments don’t mean a hospital stay or a long, uncomfortable recovery. Vasculaze is a quick procedure, taking only a few seconds per vein treated. Patients can come into the office and leave within minutes, depending on how extensive the vein or vein network is. Please speak to your aesthetic provider about activities that will encourage increased blood flow, like heavy exercise, as they may request you wait a few days to a week

depending on the area you had treated.

Areas treated should stay out of sunlight and be protected with sunblock with SPF.
